

FELICIA VON BRAUN

ASPIRING FRONTEND DEVELOPER

PROFILE

I am studying at Medieinstitutet in Gothenburg to become a Frontend Developer and I will be fully-trained in May 2022. As a person I'm full of ideas, energy and purposefulness. Working both individually and in big groups suits me well. Together with my backpack I have been traveling around the world, which among many things has taught me to take responsibility, budget and plan. What developed me even more was to move abroad and organize a life with work and housing. You can always find me around friends or family and with all my technology gadgets close by.

**2019 -
TODAY**

FÄSTNINGSTERRASSEN

- Waitress.

Seasonal job. Among many good things I am learning, some are to deal with stress, multitasking and direct customer contact.

**2017-
2019**

LEOVEGAS GAMING PLC

- Swedish Senior Customer Support Agent.

Permanent employment. LeoVegas has developed me in more ways than I can put on paper. Teamwork within a bigger team and other departments, working under pressure, following routines and being compliant, developed my English language, and learned how a big company operates.

**2016-
2017**

SKENE UTBILDNING & UTVECKLING AB

- Seller.

Permanent employment. Selling safety education in the construction industry. To create and publish newsletters along with google analytics was also among my responsibilities.

EDUCATION

2020-2022 Frontend Developer
Medieinstitutet, Gothenburg.

2013-2016 Economics High School
Marks Gymnasieskola, Skene.
